No, I was talking about the project proposal that Silverton/San Juan County submitted to EPA. There was some email traffic about it and questions from AP yesterday. The public meeting tonight will be rolling that project proposal out to the community. I consulted with the mayor, county manager and town manager, and decided it would be best if I didn't attend the meeting. We didn't want my presence to distract from the message they wanted to deliver and the discussion they wanted to have with the community.

Sunnyside's proposal was discussed only in the context of the timeline of planned activities for ARSG. The other Sunnyside item was a short discussion of their sampling and investigation work around the Mayflower tailings.

All,

Attorney Client/Ex. 5

The other topic that may be covered is the Silverton/San Juan County proposal that has already been picked up by the AP.

Cynthia
